**Where risk meets opportunity.** As the world's leading derivatives marketplace, CME Group ([www.cmegroup.com](http://www.cmegroup.com)) is where the world comes to manage risk. CME Group enables clients to trade futures, options, cash and OTC markets, optimize portfolios, and analyze data. CME Group exchanges offer the widest range of global benchmark products across all major asset classes including interest rates, equity indexes, FX, energy, agricultural products and metals.

Neither futures trading nor swaps trading are suitable for all investors, and each involves the risk of loss. Swaps trading should only be undertaken by investors who are Eligible Contract Participants (ECPs) within the meaning of Section 1a(18) of the Commodity Exchange Act. Futures and swaps each are leveraged investments and, because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for either a futures or swaps position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles and only a portion of those funds should be devoted to any one trade because traders cannot expect to profit on every trade.
